

netwrix

Netwrix “nasce” come prodotto per monitorare e tracciare le attività degli utenti. Come ad esempio l’accesso ai singoli file.

È uno strumento per rilevare le minacce per la sicurezza, dimostrare la conformità e aumentare l’efficienza monitorando le attività degli utenti. Le caratteristiche principali che include questo tool:

- controllo accesso ai file
- login e attività degli utenti
- accesso ai database SQL
- altri 15 tool di auditing

Lo strumento è in grado di generare allarmi oltre che inviare rapporti regolari sulle attività monitorate.
